2. Portfolio Management Service (PMS)

Target: 1.00Cr

The funds endeavor to generate alpha and risk adjusted returns for the investor by investing in benchmark agnostic multi-cap portfolio with bias towards companies which classify in the mid and small market capitalization.

- The Selected Funds invest in companies where valuations are attractive and strong underlying fundamentals form high intrinsic value.
- The companies selected have a strong economic moat that helps them build a competitive advantage to not just withstand economic headwinds but also to compound their earnings over the long term.

PMS Funds

4. Private Equity

Target: 1.00Cr

The investment strategy is to invest across high quality Fixed Income Instruments along with structured diversified portfolio with an aim to generate periodic cash flows and capital growth.

- The popularity of unlisted shares has grown as a result of the competition between new-age companies to reach the necessary threshold for being listed on the stock market. The majority of unlisted stocks are related to start-ups or small businesses. Evidently, small businesses have a smaller basis and hence expand more quickly than well-established businesses.
- In contrast to investing later, investing in a start-up at an early stage will benefit the investor more because it will result in greater profits and ownership holdings. Early investment in a start-up not only promises higher returns but also makes sure the investor provides guidance and decisions to the business.

Top Performing Unlisted Scripts
